
PriceList for Channel Roof Ceiling Batten Roll Forming Machine For Light Steel C Truss - C Purlin Channel Roll Forming Machine - Haixing Industrial

C purlin channel roll forming machine process:

The strip is fed from the tail of the equipment and pressed through various press rolls to form a C-shaped steel to be sent out from the head.

Purlin roll forming machine technical parameters		
1	Suitable to process	Steel plate
2	Rollers	12 rows
3	Dimensions	11*1.3*1.5m
4	Power	11.5kw+7.5kw
5	Thickness of the plate	1-3mm
6	Productivity	8-10m/min
7	Middle plate thickness	20mm
8	Driving ways	2.6-inch China wheels and link chain
9	Diameter and material of the forming axis	80mm
10	Weight	About 8.5T
11	Voltage	380V 50HZ3 phase
12	Roll material	GCr15(bearing steel)hard chrome plated after heat treatment
13	Shaft material	40Cr Modulation of heat treatment after polishing hard chromium plating
14	On both sides of the wall material	A3 steel
15	Frame	International H-beam
16	Blade material	Cr12Mov
17	Forming wheel	Bearing steel quenching

The machine comprises the following parts:

Single-end feeding machine(max capacity 5T), Feeding leveling, Forming system, Straightening mechanism(one word original), At single + double holes, After forming shear system, Supporting material platform(6m).
