

## Big discounting Glazed Tile Machine - Rock Wool Sandwich Sheet Production Line - Haixing Industrial

| Rock Wool Sandwich Sheet Production Line parameters |                              |   |
|---|------------------------------|---|
| 1   | Equipment overall dimensions | 30m*2.6m*3m   |
| 2   | Total weight                 | About 16 ton  |
| 3   | Control system               | Omron encoder PLC   |
| 4   | Main motor power             | Planetary cycloid reducer, 4kw, 380V, 50HZ  |
| 5   | Processing speed             | 4~4.5 m/min, continuous stepless adjusted, variable frequency speed regulation, digital display |
| 6   | raw material                 | 1.2 meters  |
| 7   | Voltage                      | 380V  |
| 8   | Roller material              | chrome plated on 45# steel forgings   |
| 9   | Number of rubber shafts      | 27 foams, 39 rock wool  |
| 10  | Total power                  | 30 kw   |
| 11  | Synchronous controller       | Digital synchronous controller  |
| 12  | Corrugated press motor power | Double-stage cycloid reducer 4kw, 380V, 50HZ  |
| 13  | Application                  | roof panel, wall panel  |

Components of rock wool sandwich sheet production line:

|                           |                             |
|---------------------------|-----------------------------|
| Roll forming machine      | 1 set                       |
| Hydraulic cutter          | 1 set                       |
| Electrical control system | 1 set                       |
| Hydraulic system          | 1 set                       |
| Normal stacker table      | 3 PC.<br>1m*1m              |
| Manual decoiler           | 1 set.<br>Maximum load: 5T. |

---

Roof advantages:

Waterproof, fireproof, antifreeze, corrosion resistant, compressive strength, light weight, beautiful, and environmentally friendly.
