Factory directly Roof Tile Roll Forming Machine - Metal Sheet Highway Guardrail Roll Forming Machine - Haixing Industrial

Metal sheet highway guardrail roll forming machine parameters:

1	Suitable to process	Color steel plate, galvanized sheet, aluminum coils and etc.
2	Effective width	310mm
3	Roller station	17 rows forming, 7 roller leveling
4	Thickness of feeding material	2.0-2.5 mm
5	Productivity	8-12m/min
6	Rollers' material	45# forging steel
7	Diameter of shaft	100mm
8	Cutting tool material:	Cr12 with quenched treatment 60-62°C
9	Weight	About 6.9T
10	Size	13.5*1.85*1.6mm
11	Voltage	380V 50Hz 3phases
12	Wall thickness of main forming machine	14mm steel plate
13	Main forming machine body	300 mm H steel
14	Total power	22+11 kw
15	Leveling power	2.2 kw

Machine picture display

Metal sheet highway guardrail roll forming machine details

The highway guardrail roll forming machine with good bending compression performance, flatness is good, and automatic fixed length cutting, automatic punching, high degree of automation, fast and convenient installation.

Package and shipment

Standard export packing: 1 x 40 GP container, main machine naked and fastened with iron wire in the container, rollers were painted with oil and packed with plastic film, electrics devices be packed with wooden box.
