

# Corrugated Roofing Sheet Roll Forming Machine Manufacturers

Corrugated roofing sheet roll forming machine manufacturers parameters

1	Main motor power	4kW/5.5KW/7.5KW or as actual demands
2	Hydraulic motor power	3kW/4KW.5.5KW or as actual demands
3	Hydraulic pressure	10-12MPa according oil pump and pump motor
4	Voltage	380V/ 3 phase/ 50 Hz (or as your requirements)
5	Control system	Automatic PLC control system
6	Main frame	350H beams/400H beams according machine demands
7	Wall sheet thickness	16mm/18mm/20mm/22mm according machine demands
8	Chain size	1 inch/1.2inch according machine demands
9	Feeding material	Galvanized steel coil/color steel coil/aluminum steel coil
10	Feeding thickness	0.3-0.8 mm
