
Sheet Coil Leveling Machine

This machine can be used for leveling various cold and hot rolled sheets. Sheet Coil Leveling Machine Suitable to process PPGI, galvanized sheet.

Machine parameters

Suitable to process	PPGI, galvanized sheet
Thickness of raw material	Slitting: Max 0.8mm Cutting: Max 2.0mm
Roller station	Up: 5 rollers Down: 6 rollers
Voltage	380V, 50HZ, 3Phase
Motor power	3 Kw (Siemens)
PLC	Delta/Siemens
Transmission	Gear transmission
Machine weight	About 2 tons

Sheet Coil Leveling Machine Details:

Packaging Details:

Main machine is covered by plastic film.

PLC control box, spare parts and other small parts are packed by wooden carton box.
