
Hydraulic Press Steel Roof Tile Making Machine

hydraulic press steel roof tile making machine Technical Parameters

Style	metal roof panel roll forming machine
Machine dimension (mm)	6500*1500*1200
Total wight (Kg)	3500
Forming steps	13 rows
Forming speed (m/min)	8-12
Hydraulic station power(Kw)	4
Diameter of shaft (mm)	75
Hydraulic pressure(MPa)	18-20
Electric condition	380V/3Phase/ 50HZ
Suitable to process	Color steel plate(G330 or G350)
Decoiler max capacity (Kgs)	10000
Control system	PLC
Raw material thickness (mm)	0.3-0.8
Effective width(mm)	750
Material width(mm)	1000
Main application	tile roof

Our Advantage

1. Our machine motor are GERMAN BRAND SIEMENS;
2. Our roller spacer are 4 mm thick seamless steel pipe;
3. Our output table can be adjust height according customer demands;
4. Our PLC control console can be look around 360 degree;
5. All easy-broken pars can be change within 14 month in free.
