
Arch Roof Building Roll Forming Machine

Main Technical Parameters of arch roof building roll forming machine

machine size	520mm*520mm*1200mm
Feeding width	914-1250mm
Equipment weight	0.5T
Material of shaft	45#steel adjustable treatment
Out diameter of shaft	φ70mm
Material of roller	Cr12, hard chromize coated HRC58-60°C
Number of forming rollers	3-4 rows
Main frame	300 H steel
Thickness of medium plate	16mm
Certification	ISO9001
Thickness of formed steel	0.3-0.8mm
Main motor power	4 KW
Bearing	6213
Brand name	HX
Forming speed	8000-10000mm/min
Feeding plate thickness	0.25-0.8mm
Removable or not	Removable type with 4 wheels
