
Double Layer Color Steel Roll roll forming machine

Our advantages

We are professional! Our factory has extensive experience in product and export processes.

We have an ultra-low price advantage! Our factory helps you save money from many details:

1, lower labor costs

2, convenient transportation

3, perfect supporting industry

Our machine is the best machine! PLC uses well-known brands to ensure high precision and easy operation.

Our machines are fully automatic: you only need to enter the length of the steel plate and the required number of pieces, the machine will run automatically.

Double Layer Color Steel Roll roll forming machine Product Description:

1	Suitable to process	color steel
2	Effective width	customize
3	Feeding width	customize
4	Rollers	13/15rows
5	Diameter of roller	75mm
6	Thickness of steel	0.3-0.8mm
7	Motor power	5.5kw
8	Pump power	4kw
9	Working speed	12m/min
10	Material of cutting knives	Cr12 quenching
11	Material of roller	45# steel quenching
12	Mainframe	350H steel
13	Voltage	as customer's requirement
14	Weight	about 4.5T
15	Size	6.5m×1.5m×1.5m

Double Layer Color Steel Roll roll forming machine details:

Components of metal roof double layer roll forming machine:

Manual uncoiler: 1 set

Guiding platform: 1 set

Coil leveler: 1 set

roll forming parts: 2sets

Electric-motor: 1 set

Cutting device: 2 sets

Hydraulic station: 1 set

PLC control: 1 set

Output Supporter table: 1 set

Delivery:

Within 35 days after receiving the deposit.
