
plastic roof tiles sheets

Plastic roof tiles sheets Product specification

Product name	synthetic resin roof tile		
Width	1050 mm		
Effectic width	960 mm		
Length	Customized		
Color	Red,Grey, blue, green or as customized		
Thickness	2.3 mm 3.0mm		
Weight	2.3 mm/4 .38kg/sqm		
	2.5 mm/4.76kg/sqm		
	3 mm/5.9kg/sqm		
Features	1. Corrosion resistance		
	2. Sound insulation		
	3. Acid and alkali and organic solvents		
	4. Good resistance to impact and low temperature		
	5. Flame retardant		
	6. Easy to install, maintenance , and clean		
	7. Environmental and healthy		
Application	This kind of synthetic resin roof sheet was widely used in the roofs, sheds, farm markets, road hoardin! ,lat to sloping roof conversion ,villas gardening ,pavillions and other fields ,Etc		
Packing list	Thickness	SQM/20''FCL(26TONS)	SQM/40''FCL(26TONS)
	2.3 mm	5800 SQMS	5800 SQMS
	2.5 mm	5400 SQMS	5400 SQMS
	3.0 mm	4500 SQMS	4500 SQMS

Popular PVC roof sheet

Plastic roof tiles sheets performance

1. Weather resistance. The surface layer of the tile is made of "ASA" high weathering engineering resin. This resin has exceptional durability in the natural environment and maintains color and physical properties even after long-term exposure to ultraviolet light and other harsh environments.
2. Color retention. In the 12,000-hour artificial aging test of the National Chemical Building Materials Testing Center, the color change (ΔE) of the tile is equal to 2.23, which is the lowest in the industry.
