
Curve Roofing Forming Machine

Curve Roofing Forming Machine parameters

Electric tension	380V 3phase 50HZ or as the customer's requirements
Material of roller	High-grade 45# forged steel plated with hard chrome plating
Controlling system	PLC
Processing speed	3-6m/min
Processing precision within	1.00mm (depend on design)
Material of cutting blade	Cr12 mold steel with quenched treatment
Roller station	8-20 Rollers
Roller material	high grade 45#steel; Cr12 quenching
Leak frame load-bearing	4.6T

Curve Roofing Forming Machine production process

Curve Roofing Forming Machine Applications

The curved panels produced by Crimp Curved Roofing Sheet Making Machine are used for the door and wall.

FAQ

Q: What can you do if the machine is broken?

A: The warranty period of our machine is 14 months, if the damaged parts can not be repaired, we can send new parts to replace the damaged parts for free, but you need to pay the courier fee yourself. If after the warranty period, we can resolve the issue through negotiation, we provide technical support for the entire life cycle of the device.

Q: Are you a trading company or a factory?

A: We are factory with professional production team and service consciousness just for exporting various types of cold roll forming machines.

Q: How long does it take to produce the machine?

A: Generally speaking, the machine can be completed within 20~45 working days. But if you need machines urgently, we can do our best to save you time.
